CLAUDIO CAMBA
JUNIOR SOFTWARE DEVELOPER

claudiocamba.com   LinkedIn   Github

PROFILE

Software Developer with a passion for using code to bring diverse experiences to life. Creative problem solver with over four years experience as a Front End Developer, where I honed my skills in agile development and delivery-focused workflow. In addition to my experience in frontend and backend development my responsibilities included Quality Assurance, A/B testing, Helpdesk support, writing documentation, training and presenting. I seek challenging opportunities in software development to further leverage my technical and analytical skills to produce creative solutions.

EXPERIENCE

Junior Software Developer - Northcoders | *11/ 2023 - Present*
• Developed mobile application using React Native & Supabase for Frontend & Backend
• Created RESTful API endpoints utilising Node, Express and PostgreSQL
• Built live full-stack CRUD application, allowing users to create, read, update & delete
• Created reusable components using React, Javascript, SCSS & Bootstrap
• Completed projects Independently and collaboratively (pair programming)
• Conducted code reviews, pull requests to features are quality-assured

Travelling - Asia & Africa | *04/ 2023 - 10/ 2023*

Front End Developer - Dentsu | *08/ 2022 - 03/ 2023*
• Conducted A/B test experiments from feasibility checks, and development through to QA
• Built A/B, MVT and Recommendation (Machine Learning) tests to increase conversion
• Utilised BrowserStack to ensure all tests were quality-assured before going live
• Inspected and provided feedback to peer test builds to guarantee quality consistency
• Developed reusable and dynamic components utilising front-end technologies

Front End Developer - Cheil UK | Samsung | *01/ 2019 - 05/ 2022*
• Created A/B tests, personalising consumer experience to improve conversion & revenue
• Optimised websites based on designs, using HTML5, CSS3, JavaScript & Adobe Target
• Performed QA and debug inspections to ensure tracked elements data is correct
• Supported multiple markets by creating in-depth tutorials and code generators
• Responsible for Optimisation implementation during the Samsung Flagship launches
• Identified brief feasibilities for strategists, to ensure that the project is completed on time
• Managed Jira Service Desk to support markets with queries regarding test builds
• Trained & Onboarded Samsung international markets on Adobe Target & Confluence
• Supervised developers to ensure all tests adhered to the company's processes

Junior Front End Developer - Evokeu | *09/ 2018 - 1/ 2019*
• Transformed designs into functional websites utilising HTML, CSS & jQuery
• Collaborated with the design team to complete projects within the given timeframe
• Utilised CMS for the creation and modification of digital content

EDUCATION

The Odin Project - Full Stack Javascript | *2022*
• React, NodeJS, Javascript, ES6, Classes, Modules, SCSS & Webpack.

Front End Web Development - Treehouse | *2018*
• HTML: HTML5, Tables, Forms, Web optimisation & web accessibility
• CSS3: CSS3 Basics, Selectors, Responsive Layout, Flexbox & Bootstrap
• JavaScript: Ajax Basics, APIs, the DOM, Data Manipulation, Algorithms & jQuery.

Bachelor of Arts in Animation - University of Westminster | *2010 - 2013*
• Produced films utilising numerous concepts in animation and visual design

SKILLS

Frontend: React, React Native, JavaScript, jQuery, SASS, CSS, Bootstrap, HTML, Material UI

Backend: Node.js, Express.js, PostgreSQL (PSQL), Supabase

Testing | Quality Assurance: Jest.js, Supertest, BrowserStack

Tools | Softwares: Git, Github, Webpack, Vite, Figma, Invision, Netlify, Bitbucket, Photoshop, Adobe XD, Sketch, Atlassian, Confluence, Jira, Monday.com

Concepts | Models: Relational Databases, User Stories, SQL Queries, Pair programming, Object-oriented programming, Functional programming, (MVC) Model View Controller, Version Control, (DOM) Document Object Model, Higher Order Functions, CI/CD, Recursion, Callbacks, Promises, (TDD) Test-Driven Development, (MVP) Minimal Viable Product

A/B Testing Tools: Adobe Target, Dynamic Yield, Visual Website Optimizer, Optimizely

PROJECTS

dishGo App: React Native and Supabase mobile application to find specific dishes near you.

Github Repository

RESTful API: Fully tested API created with Jest.js, Node.js, PostgreSQL and Express.js.
